FULL STACK DEVELOPER

Self-taught **MERN Full Stack** developer with **9 months** of industrial experience. I have a solid grasp of **REST APIs, NoSQL databases, Node.js, React.js, Microservices, Docker, Kubernetes**, and more. I have a strong technical foundation in software development and I'm enthusiastic about creating scalable and reliable applications.

TECHNICAL SKILLS

Languages	: JavaScript, Typescript, HTML, CSS
Frameworks	: Express
Server	: Node.js
Libraries	: React.js, Redux, React Router
Cloud Platforms	: Amazon Web Services(AWS) EC2, DigitalOcean
Databases	: MongoDB, PostgreSQL
Version Control	: Git
API Development	: RESTful API
API Testing	: Postman
Architecture	: MVC, Microservices and Monolithic
DevOps	: GitHub Action, Docker, Kubernetes

PROJECTS

Juco Berry E-commerce website *Handlebars, CSS, Nodejs, Express.js, MongoDB, Git, Docker, AWS* [Source Code](#)

- I designed and developed a modern website using **Handlebars, CSS, and JavaScript** utilized technologies like **Node.js, Express.js, and MongoDB** for this project.
- This project involved creating a tailored food ordering website for a specific restaurant, guaranteeing a seamless and enjoyable dining experience for users
- Implemented session and cookies for authentication, with **Twilio Authentication API for 2FA**.
- Integrated **Razorpay** for payment processing, supporting both online payments and COD.
- I implemented an **MVC architecture** to manage and scale the application effectively.
- The application was hosted on **AWS EC2 with nginx** for reliable and scalable deployment. Additionally, I **Dockerized** the application for easier portability and deployment.
- I also set up automated deployment processes using GitHub Actions for Continuous Integration and Continuous Deployment (**CI/CD**).

EXPERIENCE

MERN Full Stack Developer Intern Feb 2023 – Present
Prototype *Kochi, Kerala*

- I designed and deployed a high-performance E-commerce website that is interactive and adaptable, using **Handlebars, CSS, JavaScript**. I utilized advanced technologies such as **Node.js, Express.js, Mongoose, and MongoDB** for this e-commerce project. It was organized following a **Model-View-Controller (MVC)** approach, which ensures easy management and scalability.
- Worked with **REST APIs** to retrieve and display data from databases
- I have experience working with **Docker** and setting up automated deployment processes using GitHub Actions for **Continuous Integration and Continuous Deployment (CI/CD)**.

EDUCATION

Bachelor of Commerce (B-com) Kannur, Kerala, India
Sir Syed Institute for Technical Studies, Kannur University Jun 2016 – Jun 2019
